HTML

CSS

Enzyme

Jest

Web Development

Hybrid App Development

PERSONAL PROJECTS

I am Tharoor (10/2020)

- A cross platform quiz application (iOS/Android) made to enhance vocabulary. Made with React Native and its dependencies. Focused mainly on UI/UX of the app. Categorised the questions based on their difficulty, and requirements of the user. Tools used: Expo Cli

Covid-19 Tracker

- Made a user friendly Covid-19 tracker along with data representation on maps, country wise data and visual representation on graphs. Used ReactJS, leaflet and ChartJS for the development. Version tool: Github and hosted on Firebase.

- [Hosted Link.](#)

Sahayak.ai

- This application is developed to help deaf-blind people interact with others with ease. The app is designed in such a way that it can be used just by using taps, swipes and other gestures, so that a deafblind person can easily use it. Allows the deafblind person to communicate using AI and touch patterns. The other person won't need the app to communicate with the deafblind person. Provides the deafblind user the ability to perform some basic daily activities by the combination of some mere touches and taps, such as map navigation, get news updates, get the time, or chat with someone.
